

Product Compliance

The Evonik Oil Additives Approach

Going Above and Beyond Expectations

Evonik innovation extends beyond its products through to its superior customer service. Consistently going beyond expectations to help our customers navigate regulatory, technical and logistical details, the Oil Additives team understands the essence of speeding your products to market.

We deliver service excellence and secure our customers' supply lines by employing strategies for steering through regulatory, environmental, health and safety regulations and guidelines.

Evonik offers expertise in international chemical notifications for our products with safety data sheets and product labeling in your native language.

An International Team

Our Evonik Product Compliance Team is strategically positioned around the globe to maximize local services for our global customers. Our multi-lingual, local experts are connected not only to each other, but also to key industry groups, our customers, and regulatory entities. This network helps us stay abreast of developments around the world and to communicate these developments to our customers effectively. All of this aids in reducing product

development, transportation and regulatory clearance times as well as their associated costs.

In addition to integrating our team's languages and locations for maximum effectiveness, we also strategically integrate their industry experience so we can provide our customers with knowledge for our products as it relates to chemicals, offshore, fuel and food notifications and applications.

Evonik Product Compliance Team members are available in every major region of the world. We speak your language!

Immersed in Global Regulation

At Evonik Oil Additives, we have a long history of working to ensure the safety of our customers and to protect the environment and our communities. We recognize the need for strict adherence to regulatory guidelines while maximizing our speed to market. This is achieved through extensive regulatory oversight, consultation, and early attention to developing regulations, including REACH, Responsible Care®, Global Harmonized System and many other requirements.

Responsible Care®

From its earliest inception, we have dedicated ourselves to the guidelines outlined in Responsible Care®. We participate in this important program through several national organizations where our plants are located. This underscores our dedication to health, safety and environmental performance as well as the communities in which we live and work.

International Chemicals Notification

With expertise in chemicals notification and registration worldwide, we ensure compliance of our products in the relevant regions. Our dedicated advisors monitor offshore, fuel and food notifications to ensure we can respond quickly with proper documentation and information.

Global Harmonized System Classification (GHS)

Our efforts extend to our Safety Data Sheets, which are available in 15 languages through our automatic dispatch system. We also continually monitor development of GHS to help us develop compliant, informative safety data sheets and labels.

All of our non-EU affiliates appointed Evonik Industries AG as their Only Representative under REACH to support EU importation of formulations containing our products.

REACH

The Oil Additives team tracked the development of REACH for the past decade, working to ensure that our products would be compliant and our systems would be in place to navigate these new regulations effectively. For example, our REACH advisors set up a substance inventory for Evonik Oil Additives and filed registrations or pre-registrations for all these substances. The dedicated team strives to ensure that our customers will not experience any delays or disruptive issues.

Evonik's Global Reach

Click the links below to learn more about...

- Evonik Oil Additives
- Product compliance
- REACH

Evonik Oil Additives is a business line of Evonik Industries. Evonik experts are part of Evonik regulatory affairs, which is extensive and global. We work within our parent organization to pool resources and knowledge that are translated into advocacy communications for our colleagues in places such as Brussels,

where many of the new regulations are developed and refined. We invite you to experience a new level of service excellence. To contact an Evonik advisor in your region, please refer to the addresses on the back cover. For more information, visit evonik.com/oil-additives

This information and all further technical advice is based on our present knowledge and experience. However, they imply no liability or other legal responsibility on our part, including with regard to existing third party intellectual property rights, especially patent rights. In particular, no warranty, whether express or implied, or guarantee of product properties in the legal sense is intended or implied. We reserve the right to make any changes according to technological progress or further developments. The customer is not released from the obligation to conduct careful inspection and testing of incoming goods. Performance of the product described herein should be verified by testing, which should be carried out only by qualified experts in the sole responsibility of the customer.
